ALPINE

Alpine Industries were established in the year 2006 and is managed by a team of Engineers who are passionate towards building and manufacturing environment - sustainable products. Key offerings include heat reduction, sound insulation, durability, absolutely maintenance-free, eco-friendly and termite resistant products. European Standard uPVC Profiles and Assisting Profiles are extruded indigenously in our state-of-the-art production facility aided by the most advanced machineries and infrastructure.

QUALITY CONTROL

Premium quality additives from the world's leading brands are used by Alpine to sustain quality. Every batch is subjected to in-house laboratory testing to ensure compliance with EN standards.

INFRASTRUCTURE

The manufacturing unit is spread over an area of 26000 sq.m². The production facility houses state-of-the-art modern manufacturing machineries, imported and completely automated, designed to perform on statutory factors of cost efficiency and accuracy with minimal manual labour and wastage. Environment-friendly and dedicated buildings function exclusively for extrusion and fabrication of windows and doors with a corporate office building on the same premises.
